ROAD DEVELOPMENT

SERVICES IN NORTHERN ALBERTA

Northern Road Builders is a heavy construction company operating from La Crete, Alberta. We were established in 2009 as a joint venture between Pineridge Logging and Forest Trotter, two experienced companies providing forest and construction industry service to Alberta for over 15 years.

Their combined effort afforded Northern Road Builders the opportunity to pursue larger and more diverse projects across the province in highway construction, subdivision development, landfill/effluent lagoon development, horizontal directional drilling, horizontal auger boring, and environmental rehabilitation. As a larger employer in northern Alberta, we strive to offer a diversity of operations to ensure our staff are well cared for year round and our customers' needs are always met.

With our equipment, expertise and experience, Northern Road Builders is not afraid of new challenges: we are confident we can meet and or exceed our customers' expectations in every project.

NOBODY DOES SAFETY LIKE NORTHERN ROAD BUILDERS

Health, safety and respect for our environment are central to Northern Road Builders' company culture. We are committed to keeping our employees as safe as possible while minimizing our impact on the world around us.

All of our employees receive on-the-job training and mentorship, and we encourage them to continue learning and improving their skills. We have mandatory safety orientations, hands-on supervision and regular face-to-face meetings where safety concerns are brought to management's attention. We have qualified safety auditors on staff, and we require our employees to follow all rules and regulations.

This commitment carries over to the environmental side as well. There are many environmental regulations to follow while working on remote job sites like ours, and we don't cut corners when it comes to our workplace practices. All of our cutblocks are replanted and brought back to their original state, ensuring the continued health of both our forests and our industry.

We are proud of our reputation for safety and environmental protection, and would be happy to discuss our practices.

CERTIFICATIONS & AFFILIATIONS:

AUGERING & HORIZONTAL DIRECTIONAL DRILLING (HDD)

Trust our top-of-the-line equipment to efficiently drill water lines, install culverts and auger bridge pipes without digging up ground. Our equipment carries wide capabilities for projects of any size across Alberta: our augers can bore bridge pipes from 16 inches to 84 inches. Behind our machines is an incredible crew of hard-workers. It's our goal to always to a better job for our clients, and we trust our teams to do high grade work.

For all of Alberta, we offer superior horizontal auger boring and horizontal directional drilling services, including:

- HIGHWAY CULVERTS
- CULVERT LINERS
- BRIDGE PIPES (16" TO 84")
- RURAL WATER LINES

ENVIRONMENTAL REMEDIATION

WE SPECIALIZE IN REPAIRING AND SECURING SLIDING ROADS, CLEANING UP CONTAMINATED GROUND, DEVELOPING LANDFILLS AND EFFLUENT LAGOONS, AND INSTALLING BRIDGE STRUCTURES. WE'RE HERE TO HELP KEEP ALBERTA IN GOOD SHAPE.

Our teams are skilled at addressing eroding roads, highway slide areas, contaminated ground and more. A large equipment inventory backed by skilled and experienced individuals allows us to deal with such issues efficiently and properly: we do our part to ensure government legislation is met or exceeded. Whatever the scope of your project, give us a call. We're always ready to take on a challenge.

ROAD & HIGHWAY REMEDIATION

When areas along the highway such as back slopes and side slopes start to slide, Northern Road Builders will do a complete repair to secure the road. Our objective is to create safe, reliable infrastructure for the benefit of our clients and communities.

CONTAMINATED SITE CLEANUPS

Our hydrovacs, excavators and more are equipped to safely remove dangerous goods spills from the ground and transport them to a licensed facility. You can rely on our team to tend to spill sites in a professional, timely manner.

BRIDGE STRUCTURES

We install strong multi-plate and single-span bridge structures with modern construction technology and a team of experienced personnel. Our teams seek ways to improve the safety of the structures we create, leaving our clients with more reliable results.

LANDFILL & EFFLUENT LAGOON DEVELOPMENT

We work with you to ensure your landfill and wastewater lagoon is skillfully and responsibly developed. You'll have our full fleet of land development equipment at your fingertips, along with a team of hard working individuals ready to get the job done right.

HIGHWAY CONSTRUCTION

WE'LL TAKE CARE OF EVERYTHING UP TO THE POINT OF PAVING: THAT INCLUDES GRADING, EXCAVATION, AND EMBANKMENT. OUR PROFESSIONALS ARE HERE TO HELP ENSURE THE SAFETY OF YOUR ROADS, FROM ADDRESSING ROADSIDE EROSION TO IMPROVING STEEP SIDE SLOPES.

Our dedicated crews do everything short of paving the road for you. It's our priority to create a safe and up to grade foundation: all you have to focus on is the oil and pavement. With our exceptionally large fleet and experienced crews, we cover every element of highway construction, from grading to embankment to auger boring. Our team will take care of any erosion, improve side slopes that are steep and unsafe and properly integrate culverts.

We look to provide reliability and efficient service for every client: work with us for proficient highway construction service.

- GRADING
- EXCAVATION
- EMBANKMENT
- SIDE SLOPE IMPROVEMENT
- CULVERT PLACEMENT
- EROSION REBUILDING
- AUGER BORING

WE USE TOPCON GPS TECHNOLOGY

With Topcon Positioning System technology, we provide far more precise highway construction than the technology systems of the past. Topcon GPS installed in our graders, crawlers, excavators and more enable us to program our equipment with the exact layout of the project. Our machines know exactly what the finished product should look like, allowing us to excavate, grade and more with astonishing precision.

OUR EQUIPMENT

Northern Road Builders has a large line of heavy equipment, ready and capable of completing the toughest construction challenges in a timely, professional manner. Among our fleet are excavators, crawlers, articulating rock trucks, motor scrapers, directional drills, auger units, graders, hydrovacs, and so much more. Combined with the equipment of our sister companies, if you need it, we've probably got it.

SUBDIVISION DEVELOPMENT

We're your one-stop shop for all subdivision development services short of paving. We specialize in all underground services, including sewage, water and storm sewer development. Our goal is always to make sure we leave a good final product with the owners, and to do so we work together with your consultants to create the best product possible. Trust our dependable fleet of diverse equipment and efficient crews to do an outstanding job.

We offer complete subdivision construction services, including:

- WATER SERVICES
- STORM SEWERS
- SEWER SYSTEMS
- GRADING
- AUGERING & HDD

EXPERIENCED SUBDIVISION DEVELOPMENT CREWS

We take great pride in our subdivision team. With many years of experience under their belts, these individuals have become commendably efficient in their field. You can expect reliable service and high productivity with our people: we care about doing our jobs well.
